RX imola

Maximised efficiency and productivity in clinical chemistry testing
RX imola
Speed, accuracy and reliability

The RX imola is a cost effective system that delivers consistent high quality results.

Capable of handling the workload of a medium to high throughput laboratory the RX imola provides rapid, comprehensive testing on a small footprint analyser.

The RX imola is a fully automated system with random access and STAT sampling functionality, boosting productivity and saving time when it matters most.

RX imola system overview

A Versatile reagent carousel with 60 cooled positions

B Unique multi-speed stirring system
RX imola - Optimise performance with:

• Less errors and greater efficiency allowing accurate and reliable results first time, everytime!

• A single analytical platform for all routine and specialised laboratory tests, including specific proteins

• With extremely low maintenance and minimal reagent usage the RX imola has no hidden costs

• Versatile and flexible the RX imola is suitable for a variety of settings including

  • Veterinary laboratories
  • Forensic toxicology

  • Clinical chemistry laboratories
  • Research laboratories
  • Food and wine testing

Universal sample carousel with 72 positions

Integrated ISE unit
Why RX imola?
Superior result quality from a system built to last

Optimised performance
- Dual reagent probe minimizes carry over increasing accuracy and throughput capabilities
- Five speed mixing arms eliminate foaming and ensures adequate mixing of latex enhanced immunoturbidimetric reagents
- 90 cuvettes onboard with cuvette check function ensuring only clean and viable reaction vessels are reused
- International accreditation CE, FDA and UL certification

High throughput
- 400 photometric tests per hour
- 240 ISE tests per hour

STAT sampling
- Unique loading hatch allows emergency samples to be analysed quickly and easily at any time

Built in inventory management system
- Calculates remaining reagent volume and number of tests available
- Storage capacity of 1,000,000 test results including 25,000 calibration results

Advanced QC capabilities
- Six different calibration options available increases confidence that the optimum algorithm is being used to achieve the most accurate results
- Automatically generates Levey-Jennings Charts, running mean values and QC statistics
- Up to 10 user defined multipoint rules

Flexibility
- RX imola is capable of running monochromatic, bi-chromatic, endpoint, kinetic, ISE, sample blanking and reagent blanking assays
- Up to 12 wavelengths can be generated via diffraction grating

Superior result quality from a system built to last
• Integrated ISE unit for sodium, potassium and chloride
• Serum indices check the integrity of patient samples flagging if samples are deemed icteric, haemolytic or lipaemic
• Dedicated micropipette facilitates crash protection, bubble and four levels of clot detection

Highly accurate testing

• Five year reusable pyrex® cuvettes removes cost of expensive consumables
• Universal sample carousel holds 72 samples and is suitable for use with all standard sample vessels
• Low water usage. Only 18 litres consumed per hour

Cost saving

• Analyse a wide range of analytes from as little as 2µl of sample
• Minimum reaction volume of 150µl results in decreased cost per test

Reduced sample volume

• 20 cooled control and calibrator positions onboard enables all the quality control material to remain on the analyser without compromising stability

Advanced onboard stability

• Automatic sample re-runs allows staff to prioritise their time
• Programmable test profiles removes the need to manually programme tests
• Up to 50 reference ranges can be specified for each assay
• Pre-programmed settings for all dedicated bar-coded reagents and closed channels removes the need to input parameters manually - select 60 parameters at any one time from a database of 500
• User defined auto start function allows priming and washing to be done out of hours

Time saving
RX imola software
Ensures straightforward and intuitive operations

Connectivity
Software capable of connecting to LIMS system via ASTM standard

RX series software commonality
Software consistent across all of the RX series, for ease-of-use and straightforward operation

Simplistic and intuitive operations
Microsoft Windows based software offers ease of navigation
Intuitive software results in minimal training requirements and enhanced productivity
Save time and costs with secure remote diagnostics allowing immediate support from expert technical and applications staff, anytime, anywhere!

Control operations from the main screen with six informative software tabs

Run monitor screen
• Displays full patient demographics
• View status in real time including time to completion

System parameters screen
• Define up to 50 normal ranges

Quality control screen
• Levey-Jennings charts, running mean values and QC

Chemistry parameter screen
• Set up to 20 test profiles and define order of analysis
• Enables sample dilution and test re-runs

Maintenance screen
• Less than five minutes daily maintenance required

Results screen
• Download and print results

Calibration screen
• Sets calibrator serial dilution and displays multipoint calibration curves

Easy to follow reports
Real time results status, including time to completion

Reduces downtime
Save time and costs with secure remote diagnostics allowing immediate support from expert technical and applications staff, anytime, anywhere!
RX imola test menu

Largest clinical chemistry test menu on the market

**Clinical**

**Autoimmune:**
- Complement Component 3
- Complement Component 4
- CRP
- CRP Full Range (0.3-160mg/l)
- CRP High Sensitivity
- IgA
- IgE
- IgG
- IgM
- Rheumatoid Factor

**Basic Metabolic Profile:**
- Calcium
- CO2 Total
- Chloride
- Creatinine Enzymatic
- Creatinine (jaffe)
- Glucose
- Potassium
- Sodium
- Urea

**Bone Profile:**
- Alkaline Phosphatase
- Calcium
- Phosphorus
- Total Protein

**Cardiac:**
- Cholesterol
- CK-MB
- CK-NAC
- CRP
- CRP Full Range (0.3-160mg/l)
- CRP High Sensitivity
- Digoxin
- Direct HDL Cholesterol
- Direct LDL Cholesterol
- Heart-Type Fatty Acid Binding Protein (H-FABP)
- Lipoprotein (a)
- Myoglobin
- sLDL
- Triglycerides
- TxB Cardio

**Comprehensive Metabolic Profile:**
- Albumin
- Alkaline Phosphatase
- ALT
- AST (GOT)
- Direct Bilirubin
- Calcium
- Chloride
- CO2 Total
- Creatinine Enzymatic
- Creatinine (jaffe)
- Glucose
- Lactate
- Potassium
- Sodium
- Total Bilirubin
- Total Protein
- Urea

**Diabetes:**
- Cholesterol
- Creatinine Enzymatic
- Creatinine (jaffe)
- Cystatin C
- Direct HDL Cholesterol
- Direct LDL Cholesterol
- Fructosamine
- Glucose
- Glycerol
- HbA1c/Hb
- Microalbumin
- NEFA (Non-Esterified Fatty Acids)
- Ranbut (Hydroxybutyrate)
- Total Protein
- Triglycerides
- Urinary Protein

**Electrolytes:**
- Calcium
- Chloride (Direct / Nondirect)
- CO2 Total
- Lithium
- Magnesium
- Potassium (Direct / Nondirect)
- Sodium (Direct / Nondirect)

**Haemolytic Anaemia:**
- G6P-DH
- Haptoglobin
- LDH

**Hepatic Function:**
- Albumin
- Aldolase
- Alkaline Phosphatase
- Alpha-1 Antitrypsin
- ALT
- Ammonia
- AST (GOT)
- Cholinesterase
- Complement Component 3
- Complement Component 4
- Direct Bilirubin
- Gamma GT
- GLDH
- Glycerol
- Haptoglobin
- IgA
- IgG
- IgM
- Iron (UIBC)
- LAP
- LDH
- Total Bilirubin
- Total Protein
- Transferrin
- Transhyretin (Prealbumin)

**Inflammation and Infection:**
- Alpha-1 Acid Glycoprotein
- ASO
- CRP
- Lactate
- Rheumatoid Factor

**Lipids:**
- Apolipoprotein A-I
- Apolipoprotein AII
- Apolipoprotein B
- Apolipoprotein CII
- Apolipoprotein CIII
- Apolipoprotein E
- Cholesterol
- Direct HDL Cholesterol
- Direct LDL Cholesterol
- Lipoprotein (a)
- sLDL
- Triglycerides

**Neonatal Screening:**
- Alpha-1 Antitrypsin
- CRP
- CRP Full Range (0.3-160mg/l)
- CRP High Sensitivity
- IgG
- Transhyretin (Prealbumin)

**Neurological Disorders (CSF):**
- IgA
- IgG
- IgM

**Nutritional Status:**
- Albumin
- Copper
- Ferritin
- Iron
- Iron (UIBC)
- Lipase
- Magnesium
- Potassium
- TIBC
- Transferrin
- Transhyretin (Prealbumin)
- Zinc

**Pancreatic Function:**
- Amylase
- Glucose
- LDH
- Lipase
- Pancreatic Amylase

**Renal Function:**
- Albumin
- Ammonia
- Beta-2 Microglobulin
- Calcium
- Cholesterol
- Creatinine Enzymatic
- Creatinine (jaffe)
- Cystatin C
- Glucose
- HbA1c/Hb
- IgG
- LDH
- Magnesium
- Microalbumin
- Potassium
- Sodium
- Phosphorus (Inorganic)
- Urinary Protein
- Urea
- Uric Acid

At Randox our highly specialised RX support team is on hand with expert advice and support regardless of where you are in the world. Our global team of expert technical and applications staff ensure unbeatable service for hassle free diagnostics.

Time is critical in any laboratory, therefore you are our top priority. Dedicated specialists answer all queries in a quick and thorough manner and our field agents are on hand at any time so you can be sure of a quick response.

Remote Access diagnostics
Our ground breaking ‘Remote Access diagnostics’ allows immediate support to your system reducing down time and the expense associated with timely call outs. Randox is committed to the smooth running of your laboratory ensuring that your system will remain operational with optimum productivity. Our unrivalled customer support and quality products also extends in the form of our leading IQC and EQA programmes, 24-7, a peer group IQC programme and RIQAS the largest global EQA scheme in the world.

Unrivalled customer service
Our global network, ensuring local support

email: rxsupport@randox.com
Our global network, ensuring local support
The RX imola is a dependable, efficient and easy to use system that delivers consistent high quality results.

Clinical chemistry testing has advanced dramatically in recent years with demands fixed on consolidation, speed, quality and cost. Randox is committed to advancing diagnostic testing to suit our customers. Investing heavily into research and development, Randox has developed a full range of clinical chemistry analysers to suit any working environment.

**RX monza**
Versatility for reduced cost, low-volume manual testing. The RX monza semi-automated clinical analyser has an integral screen, keyboard and printer.

**RX daytona**
Convenient bench top system, the RX daytona clinical analyser has a throughput of 450 tests per hour including ISEs via the optional ISE unit.
including clinical, paediatric, research, veterinary, forensic and pharmaceutical laboratories.

The RX series of clinical analysers has an impressive range of time-saving and cost-saving features. All offer outstanding flexibility coupled with optimum reliability.

RX imola
Designed for medium to high throughout laboratories, the RX imola is a random access bench top clinical analyser with a maximum throughput of 560 tests per hour including ISEs.

RX suzuka
The latest addition to the RX family of analysers; the RX suzuka is a fully automated, discrete random access clinical analyser with a throughput of 1200 tests per hour including ISEs.
